## **CDPH Reports No Confirmed Cases of Ebola in the State**

**CDPH Press Release dated 8/19/2014**

Low-risk patient tested out of an abundance of caution; The California Department of Public Health (CDPH) is working with local health departments and health care providers statewide to identify patients who have traveled to countries affected by Ebola. CDPH is directing health providers to follow protocols established by the federal Centers for Disease Control and Prevention (CDC) in the diagnosis and treatment of these patients. People returning from the affected areas who may be at high risk for Ebola should be isolated and their blood sent to CDC for testing. Some low-risk patients, like the one from Sacramento, may be tested out of an abundance of caution. CDPH works with local health departments and hospitals to arrange for proper specimen shipment and Ebola virus confirmatory testing.

There are currently no confirmed cases of Ebola in California. There have been no patients admitted to California hospitals who are considered to be at high risk of Ebola according to CDC criteria.

If a person has travelled to an affected country and develops a fever within three weeks of their return, they should contact their health care provider and let the provider know of their travel history.

The risk of the spread of Ebola in California is low. Any patient suspected of having Ebola can be safely managed in a California hospital following recommended isolation and infection control procedures. Suspect cases of Ebola will be investigated by local health departments in consultation with CDPH.

State and local public health officials in California are monitoring the situation closely and taking steps to keep Californians safe. Our advanced health care system has appropriate protocols in place to prevent the spread of this often deadly disease.

Ebola is an infectious disease caused by the Ebola virus. Symptoms may appear anywhere from two to 21 days after exposure and include fever, headache, joint and muscle aches, weakness, diarrhea, vomiting, stomach pain and abnormal bleeding. It is classified as a viral hemorrhagic fever (VHF) because of the fever and abnormal bleeding. Among the VHFs, Ebola is feared because of its high mortality. There are no specific treatments but supportive therapy can be provided to address bleeding and other complications.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

An upper level ridge off the West Coast will bring mostly dry conditions to much of northwest California for the next several days. Log clouds and patchy areas of drizzle will impact coastal areas each night and morning.

#### **San Francisco Weather:**

Low clouds extend well inland again this morning. Local drizzle can be expected along the coast through the early morning hours. Low clouds will clear in the afternoon but temperatures will be cool again. Only slow warming is expected away from the coast Thursday through Sunday.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

Near to slightly cooler than normal temperatures expected through the weekend. A slight chance of thunderstorms will be possible over the Sierra Nevada to the south of Lake Tahoe late today.

#### **Hanford Weather:**

An upper level low centered just offshore the Southern California coast will track southward. A slight chance of thunderstorms is expected in the mountains and desert through Thursday.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

An upper low will be present today through Friday. It will bring low clouds to the coasts and valleys. It will also bring a chance of thunderstorms to Los Angeles County today and a slight chance of thunderstorms to the Los Angeles and Ventura mountains as well as the Antelope Valley Thursday. Afternoon highs will be below normal through the end of the week. Clearer skies and warmer temperatures are on tap for the weekend.

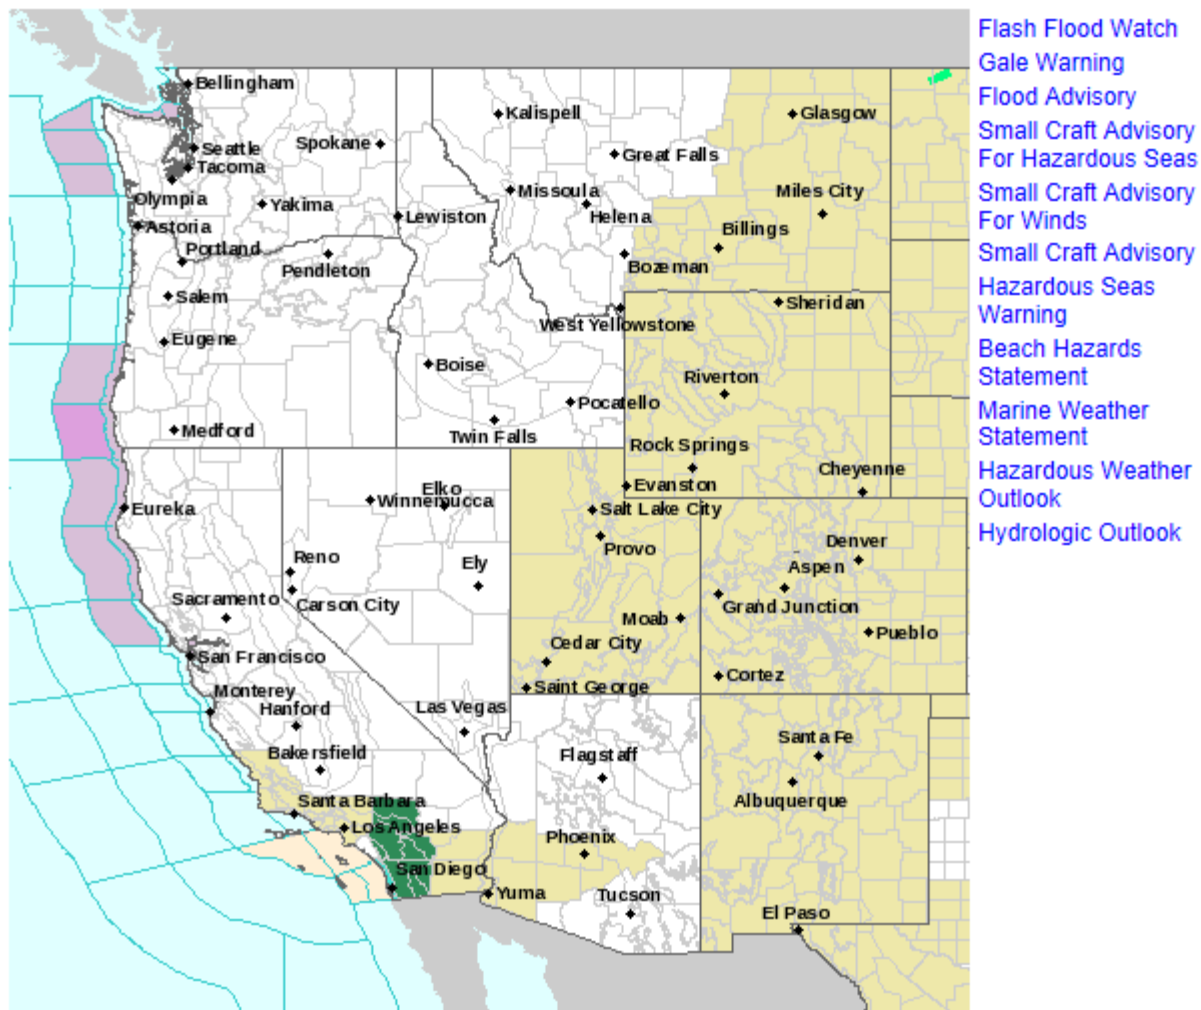

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

A low pressure system will move through southern California through Thursday and bring chances for showers and thunderstorms. Temperatures will be below normal with night and morning low clouds in coastal and valley areas. Fair and warmer weather will return Friday as the low pressure exits to the east with fewer low clouds and only minor day to day fluctuations in temperatures over the weekend. Further warming is possible early next week to near normal levels.

#### **Southeast California Weather:**

There will be a slight chance of showers and thunderstorms today. Chances of storm activity increase on Thursday as an upper low pressure system along the California coast moves towards the Desert Southwest. Drier air spreading in from the west will reduce thunderstorm activity from this weekend into early next week. Below normal temperatures are forecast from today through Friday and then warming this weekend.

### Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 18<sup>th</sup> : Don Pedro 42%; Exchequer 18%; Folsom Lake 40%; Lake Oroville 33%; Millerton Lake 47%; New Melones 24%; Pine Flat 12%; San Luis 20%; Lake Shasta 32%; Trinity Lake 31%; Pyramid Lake 94%; and Castaic Lake 44%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)  
Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water<sup>1</sup> to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

### Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
